

# WHAT'S HOLDING YOUR CHURCH'S INTERNET BACK?

## IDENTIFY COMMON CONNECTIVITY CHALLENGES AND FIND TAILORED SOLUTIONS

ARE YOU EXPERIENCING INTERNET ISSUES DURING SERVICES OR EVENTS?

### Future-Proofing Suggestion

Even if things are running smoothly, we can help you identify hidden opportunities for faster speeds, stronger security, and future growth. **Schedule a consultation with Lamb Telecom** to ensure your network is built to last.

Yes

1

Is your Wi-Fi signal weak or inconsistent in certain areas of the building?

**Solution:** Install Wi-Fi extenders or upgrade to mesh networks for broader coverage.

No

2

Do your livestreams buffer or lag during peak times?

**Solution:** Upgrade to a high-speed internet plan or optimize your bandwidth allocation.

No

3

Are you unsure which devices are hogging your network bandwidth?

**Solution:** Use network management tools to monitor device usage and identify bandwidth-heavy devices. Limit or schedule non-essential updates during service times.

No

4

Do you experience frequent disconnections or outages?

**Solution:** Switch to a more reliable internet provider or check for faulty hardware connections.

No

Your network might just need minor optimizations!

5

Prompt: Still facing issues?

**Contact Lamb Telecom** for a customized consultation to optimize your church's internet!
